USER PERSONA

NAME: **Ravi Kumar**

AGE & GENDER : **40 Years & Male**

OCCUPATION : **Teacher**

RESIDENTIAL LOCATION : **Dharmapuri**

BACKGROUND

Ravi Kumar is a **government school teacher** in Dharmapuri. He frequently visits the Taluk Office for services like community certificates, income certificates, and Aadhaar updates. Due to his **busy teaching schedule**, he prefers completing government services quickly with **minimal waiting time**.

PAIN POINTS

- Long waiting times at the Taluk Office.
- No visibility of the current queue status.
- Uncertainty about when his turn will arrive.
- Repeatedly asking staff for queue updates.

USER NEEDS

- Online appointment booking for Taluk Office services.
- Digital queue token with estimated waiting time.
- Live queue status updates.
- Notifications before his turn.
- Clear document checklist for each service.

TECHNOLOGY & BEHAVIOUR

- WhatsApp
- UPI Apps (PhonePe / Google Pay)
- Chrome Browser
- Prefers online services over manual processes.
- Uses a smartphone for everyday tasks.

USER PERSONA

NAME : **M. Rajendran**

AGE & GENDER : **45 Years & Male**

OCCUPATION : **College Bus Driver**

RESIDENTIAL LOCATION : **Salem**

BACKGROUND

Rajendran works as a college bus driver and has a **busy daily schedule.** Whenever he needs to apply for or update his Aadhaar details at the Taluk Office, he has to **take a full day's leave** from work. He often spends several hours **waiting in long queues** and is unsure about the required documents before visiting, which sometimes leads to **repeated visits.**

PAIN POINTS

- Feels frustrated when his leave is wasted.
- Gets anxious about missing work.
- Disappointed when asked to revisit due to missing documents.

USER NEEDS

- Online appointment booking.
- Digital queue token.
- Live queue status.
- Document checklist for Aadhaar services.
- Notifications before his turn.

TECHNOLOGY & BEHAVIOUR

- Uses an Android smartphone daily.
- Uses WhatsApp and UPI apps regularly.
- Usually searches for information online before visiting government offices.

USER PERSONA

NAME : **Lakshmi Ammal**

AGE & GENDER : **52 Years & Female**

OCCUPATION : **Shopkeeper**

RESIDENTIAL LOCATION : **Erode**

BACKGROUND

Lakshmi Ammal is a **shopkeeper** from Erode who visits the Taluk Office for government services. She prefers a simple, **easy-to-use system** with clear instructions and minimal waiting time so she can return to her shop quickly.

PAIN POINTS

- Long queues and crowded waiting areas.
- Difficulty understanding the application process.
- Physical discomfort while standing for long periods.
- Fear of missing her turn.

USER NEEDS

- Easy appointment booking.
- Simple and easy-to-understand interface.
- Large buttons and readable text.
- Queue notifications before her turn.

TECHNOLOGY & BEHAVIOUR

- PhonePe
- SMS Notifications
- Voice Calling
- Uses a smartphone for basic daily activities.
- Prefers simple and clear instructions.

USER PERSONA

NAME: **Suresh Kumar**

AGE & GENDER : **28 years, Male**

OCCUPATION : **Delivery Man**

RESIDENTIAL LOCATION : **Erode**

BACKGROUND

Suresh Kumar is a **28-year-old delivery executive working** for a logistics company in Erode. His job requires him to deliver packages to multiple locations every day within strict deadlines. Occasionally, he needs to visit government offices for services such as vehicle registration renewal, driving licence updates, tax payments.

PAIN POINTS

- Difficulty managing deliveries while waiting in long queues.
- Multiple visits required due to missing documents or incomplete information.
- No appointment booking facility, leading to overcrowding.
- Loss of daily income because of extended waiting time.

USER NEEDS

- Book a government office appointment online before arriving.
- Receive a digital queue token on the mobile phone.
- View the estimated waiting time to plan deliveries.
- Get SMS or app notifications when the turn is approaching.

TECHNOLOGY & BEHAVIOUR

- Android Smartphone
- Government Queue Management Mobile App/Web Portal
- Google Maps (to locate the office)
- Uses a smartphone to access government services.

USER PERSONA

NAME: **Lakshmi Priya**

AGE & GENDER : **42 years, Female**

OCCUPATION : **Tailoring Shop**

RESIDENTIAL LOCATION : **Erode**

BACKGROUND

Lakshmi Priya **owns a tailoring shop** in Erode. She frequently visits government offices for **business license renewal, GST-related services**, and income certificate applications. Managing both her shop and government visits is challenging because long waiting times reduce her business hours.

PAIN POINTS

- Long waiting times at government offices reduce business hours.
- Loss of income when the shop remains closed during office visits.
- Uncertainty about queue length and waiting time.

USER NEEDS

- Complete government services in a single visit.
- View the list of required documents before arriving.
- Reschedule or cancel appointments if business needs arise.

TECHNOLOGY & BEHAVIOUR

- Government Queue Management App/Web Portal
- WhatsApp
- SMS Notifications
- UPI Apps (PhonePe, Google Pay, Paytm)
- Plans government office visits during non-peak business hours.

USER PERSONA

NAME: **Nishanth**

AGE & GENDER : **25 years, Male**

OCCUPATION : **Taluk Office Assistant**

RESIDENTIAL LOCATION : **Perundurai**

BACKGROUND

Nishanth is responsible for assisting citizens with Aadhaar services and certificate applications. Every day, he manages hundreds of visitors, verifies documents, and processes applications. Heavy crowds and incomplete documentation often slow down the workflow and increase waiting times.

PAIN POINTS

- Manages long queues and overcrowding during peak hours.
- Delays caused by citizens arriving without the required documents.
- Difficulty handling walk-in visitors alongside scheduled appointments.

USER NEEDS

- A digital dashboard to view and manage daily appointments.
- Citizens should be informed of required documents before visiting.
- An automated token and queue management system.
- An organized workflow that reduces manual effort and waiting time.

TECHNOLOGY & BEHAVIOUR

- Government Queue Management App/Web Portal
- WhatsApp
- SMS Notifications
- UPI Apps (PhonePe, Google Pay, Paytm)
- Uses a desktop computer with government service portals.
