01 / FOUNDATIONS

Clarity for every citizen.

A practical visual reference for QLESS, the smart queue management app for Taluk Office government services. Built from the existing project, with recommendations clearly separated.

01 Brand overview

OBSERVED

LOGIN IDENTITY · 30 PX / 700

QLESS

Smart Queue Management

Taluk Office Services

Skip the long queue.
Save your time.

Trustworthy, not decorative.
Readable before expressive.
One clear next step at a time.

EDITORIAL PRINCIPLES · RECOMMENDED

OBSERVED
Values or elements visible in Login, Home, Profile and Income Certificate.

RECOMMENDED
Standardized rules and new states for future work; not evidence of implementation.

02 Core color palette

OBSERVED

#1E3A8A	#0F172A	#64748B	#E2E8F0
Identity / Navy	**Text / Primary**	**Text / Muted**	**Border / Divider**
Headers, primary actions, brand and links.	Headings, labels and important values.	Supporting copy and secondary metadata.	Card outlines and quiet separators.

#FBFAFC	#FFFFFF	#EFF6FF	#3B82F6
Canvas / Neutral	**Surface / White**	**Surface / Pale blue**	**Accent / Service blue**
Main app background behind white cards.	Service cards, controls and navigation.	Profile initials background.	Estimated waiting-time emphasis.

Supporting colors · observed, purpose-specific

#C8D5E1	#B91C1C	#FECACA	#15803D	#DCFCE7
Login input border	Logout label / icon	Logout border	Document check	Check background

> **Use the majority language; keep the exception explicit.**
> Navy and neutral surfaces form the core identity. The older My Queue screen uses cream #FFFBE9, lime #F7FFB6 and black outlines. Treat it as a legacy exception, not a second brand palette. Existing app screens remain unchanged.

Recommended usage: keep most surfaces neutral, reserve navy for identity and actions, and use service blue or semantic colors only where they communicate meaning. Color names in this guide are documentation aliases, not published project tokens.

02 / VISUAL SYSTEM

Order creates confidence.

Inter carries the interface. Clear hierarchy, compact spacing and soft card boundaries help citizens scan services, requirements and queue information quickly.

03 Typography hierarchy

OBSERVED + STANDARDIZED

400 / 500 / 600 / 700

Login wordmark	**QLESS**	30 px / 700 / 36 px* Observed tracking −0.6 px
Login heading	**Welcome to QLESS**	26 px / 700 / 31.2 px Observed 1200. line height
App brand	**QLESS**	22 px / 700 / 27 px*
Section heading	**Services**	18 px / 600 / 22 px 22 px observed on Profile
Label / Card title	**Mobile Number**	16 px / 600 / 20 px Observed on Login and Profile
Body	Bring original documents for verification.	14 px / 400 / 21 px Observed 1505. line height
Supporting caption	Taluk Office Government Services	13 px / 400–600 / 16 px Weight varies by screen
Navigation label	Home My Token Profile	12 px / 600–700 / 16 px* Active label uses 700 in detail navigation

* Recommended explicit line heights where the source uses auto. Samples use the project size and weight; the guide's chapter titles are documentation typography, not app styles. Login action text is 17/600; booking actions use 16/700 and 14/700.

04 Spacing and layout

OBSERVED + RECOMMENDED

Use a compact, repeatable rhythm

8	▬	Related elements
12	▬▬	Card gaps / detail body
16	▬▬▬	Detail padding
20	▬▬▬▬	Home / Profile gutter
24	▬▬▬▬▬	Major content groups

Observed values, organized into a recommended scale. Keep 4 px for small internal adjustments; do not force every source measurement onto a new grid.

390 px reference width

16–20 px inset

16 px card padding

48 px login action / search

Reference screens are 390–394 px wide. Recommend fluid cards, a single scroll column and content clearance above the 72 px bottom navigation. Add platform safe-area insets separately.

05 Corners, borders and elevation

OBSERVED

Controls	Service / Profile	Detail / Login
12 px radius · login field / actions	16 px radius · card boundary	18 px radius · information cards

Observed: 1 px #E2E8F0 card outlines; login card shadow 0 | 4 / 12 / #0F172A08. Recommended: use borders as the default separation, reserve the soft shadow for raised sign-in surfaces, and avoid the legacy queue's heavy inset shadow.
